

Product Description

G45 incandescent bulb

The G45 filament bulb is a lighting product that is both beautiful and practical. The "G45" in its name represents the diameter of the bulb, which is about 45 mm. Whether it is daily home use or specific electrical equipment, the G45 filament bulb can be perfectly adapted. The product supports a variety of lamp holder specifications, including G45 E14 bulb, E26 G45 bulb, and e27 g45 bulb, and is compatible with mainstream lamps around the world.

Advantage

1. Warm and Comfortable Light

The G45 filament bulb emits soft and warm light, with a color temperature (2700K) close to natural light, creating a warm and comfortable atmosphere that fills the space with a homely feel.

2. Wide Adaptability

Todaybulb's G45 light bulb with different base design, the G45 E14 bulb and E26 G45 bulb can be easily installed in various lamps without worrying about compatibility issues.

3. Extreme temperatures resistance

In high-temperature scenarios such as ovens and microwaves (above 100°C), the G45 filament bulb has far superior heat resistance compared to LED bulbs. It can also be instantly activated in the freezer compartment of a refrigerator (-20°C).

4. High CRI

Todaybulb's G45 filament bulb, with a Color Rendering Index (CRI) over 95, accurately restores the color of objects, avoiding color distortion caused by the spectral deficiencies of LED bulbs.

E26/ E27/E14 Base

Frosted/ Clear finish

Warm lighting

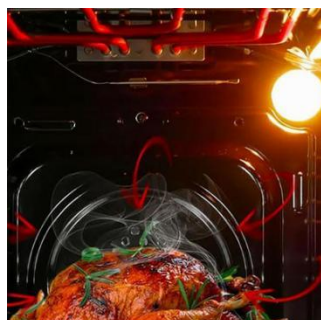

Standard incandescent bulb

Feature

- ✓ Dimmable
- ✓ CRI=100
- ✓ heat resistance
- ✓ Cheap price
- ✓ Warm white
- ✓ Wide Adaptability
- ✓ 1000 hours life span
- ✓ Generate heat and warm environment

Application

- Table lamps
- Oven
- Refrigerators
- Microwaves
